

THE STAGES OF DEVELOPMENT FRAMEWORK

Indicator worksheet

The indicator worksheet provides a list of all the indicators used as part of the Stages of Development tool. The list provides recommended sources to access the village / geography specific data against the indicators listed. Alternatively, the user can also print this form for primary data collection and use the indicators as a reference for their baseline / scoping studies. Data need not be collected for all the indicators in each of the sector, if not relevant for your geography / your offerings. However, data needs to be collected for all the cross-cutting indicators.

Please select only one option for each indicator selected.
